Due to this there are
1	Patient Registration	UC-01	Registrant chooses to Register Registrant provides all the appropraite Info and the info is valid.	A new patient is created and placed into the HealthNet System							
2	Patient Registration	UC-01	Registrant chooses to Register Registrant provides invalid Information at any of the propmts. Note:Please test each input situation seperatey for this and if one fails, indicate which prompt (Basic Info, Medical Info, Login).	Regardles of when in the system the invalid Information is given the System should give message to the user stating that there was an invalid response, and returns to the information prompt							
3	Patient Registarion	UC-01	1Registrant chooses to Register 2.During the registration process user decides to cancel registration	System deletes any and all information given in registration, and returns homepage							
4	Administrator Registration	UC-02	Create an admin super user through django console	A new Administator is created		In the process of being changed					
5	Administrator Registration	UC-02	Registrant goes to create an admin Provides invalid infromation Note: If there is a failure indicate at which prompt failure occurred	System rejects the information given, alerts the user invalid info for certain fields, awaits new information to be given		In the process of being changed					
6	Administrator Registration	UC-02	1User chooses Administration Registration 2During Registration user cancels	System deletes any and all information given in registration, and returns homepage		In the process of being changed	Deprecated Test/ Will not be marked past this release				
7	Update Patient Profile Information	UC-03	1User selects to update their information 2User chooses a piece of Information and updates it	System updates the users information, displays updated infromation confirmation							
8	Update Patient Profile Information	UC-03	1User selects to update their informtation 2User chooses to cancel the process without either changing anything or saving changes	System deletes any new information, and redisplays unchanged patient info page as confirmation							
9	Update Patient Medical Information	UC-04	Staff member chooses to update the medical information of a patient Staff member makes changes to medical Information Staff member saves changes	The patients medical information is changed and updated, and the system displays the medical information to show this							
10	Update Patient Medical Information	UC-04	Staff member chooses to update a patients medical infromation Staff member decides half way through to cancel the update	The system deletes any of the updated infromation, and returns to the medical information page.(no changes are made on the page)							
11	Export Information	UC-05	1User Chooses to export information from the system. 2User selects format 3.User confirms export	The user downloads their information in whatever format they choose.							
12	Export Information	UC-05	1.User Chooses to export information 2.At any time in the process the user cancels	System exits from export page, no information is exproted							
13	Crreate or Update Patient appointment	UC-06	1.User chooses to create a new appointment 2.User provides required information 3.User saves appointment	System creates, and adds the appointment to the users calender							
14	Create or Update Patient appointment	UC-06	1.User chooses to update an appointment 2.user updates field	System update required fields and saves them							
15	Create or Update Patient appointment	UC-06	1.User chooses to create new appointment 2.User provides some form of bad information	System rejects information, notifies the user, and awaits correct input or cancellation							
16	Create or Update Patient appointment	UC-06	1.User chooses to create new appointment 2.User cancels the process	System closes appointment creation window.							
17	Create or Update Patient appointment	UC-06	1. User chooses to update appointment 2. User provides invalid data for replacement	System rejects information, notifies the user, and awaits correct input or cancellation							

18	Create or Update Patient appointment	UC-06	1.User chooses to update an appointment 2.user cancels the update	System exits from appointment update				
19	Cancel Appointment	UC-07	User selects appointment from calender selects to cancel it	System deletes the appointment				
20	Cancel Appointment	UC-07	1.User selects an appointment to cancel 2.User decides to not cancel the appointment	No changes made				
21	Appointment Calender	UC-08	1.User selects "appointment calendar" button	Calender with all appointments is displayed				
22	Add/Remove Perscriptions	UC-09	Doctor chooses to add perscription to patient Doctor properly fills out required fields Confirms adding the perscription	Perscription is added to the patient in the system				
23	Add/Remove Perscriptions	UC-09	Doctor chooses to update perscription Doctor updates required information Doctor confirms	Perscription is updated in the system				
24	Add/Remove Perscriptions	UC-09	Doctor chooses to delete a perscirpiton Doctor deletes the perscription	System removes perscripton from patient in the system				
25	Add/Remove Perscriptions	UC-09	1.Doctor Chooses to add a perscription 2.Doctor cancels operation Note:Repeat this test 2 more times, testing updating and removing for the same functionality. If one fails mark the category as failed, but specify which ones specifically	System stops operation and returns with no changes made to patient in the system.				
			failed.					
26	Viewing Patient Medical Information	UC-10	Staff goes to view information Chooses patient from a list of their patients Staff selects patient and to view information	System displays patient medical information				
27	Viewing Patient Medical Information	UC-10	1.User goes to view Information 2.User provides login 3.User selects account information 4.Patient selects to view either tests, perscriptions tabs	System displays patient medical information				
28	Viewing Patient Medical Information	UC-10	Staff goes to view information Improper credentials	System does not allow the viewing of medical information				
29	Viewing Patient Medical Information	UC-10	Staff goes to view Information Gives proper credentials searches for a nonexistant patient	system alerts user that patient does not exist, allows user to search for another				
30	Viewing Patient Medical Information	UC-10	1.Patient goes to view medical information 2.Improper login crednetials	System displays message, and does not allow user to view info				
31	Release Test Results	UC-11	1.Doctor selects to release test 2.Doctor selects patient and test 3.Adds any notes needed to release 4.confirms releasing	System releases test results and notes, patient can view				
32	Release Test Results	UC-11	Doctor selects test results already released 2.makes edits to the notes Saves	System saves changes, and updates the test.				
33	Release Test Results	UC-11	Doctor chooses to release test or update cancels process	System makes no changes, returns to previous page				
34	Logging System Activity	UC-12	Staff provides proper credentials Staff takes any action on the system	System records time of action, date of action, and actor(staff member)				
35	Admission and Discharge	UC-13	Staff goes to check patient into Hospital 2.Enters all valid information 3.Confirms	System adds the patient to the list of patient objects currently in hospital				
36	Admission and Discharge	UC-13	Staff goes to discharge patient from hospital 2.Enters valid information 3.Confirms	System removes patient from list on patients in hospital				
37	Admission and Discharge	UC-13	Staff goes to admit patient Enters invalid Information	System alerts to invalid info				
38	Admission and Discharge	UC-13	Staff goes to discharge patient Invalid information is given	System alerts to invalid info				
39	Admission and Discharge	UC-13	Staff goes to admit patient Cancels admisson process	System doesn't make any changes, goes back to previous page				
40	Admission and Discharge	UC-13	1.Staff goes to discharge patient 2.Cancels Process	System doesn't make any changes, goes back to previous page				
41	Viewing Activity Log	UC-14	Admin with proper credentials goes to view activity logs	System displays activity logs				
	1	1	1	1				

42	Viewing Activity Log	UC-14	User with imporper Credentials goes to view Logs	System diplays message that users credentials are not high enough					
43	View System Statistics	UC-15	1.User with proper credentials goes to view Hospital Statistics	System displays statistics					
44	View System Statistics	UC-15	User with improper credentials goes to view Hosptial Statitics	System displays message stating credentials are not sufficeent					
45	Patient Transfer	UC-16	Doctor chooses to transfer patient provides required information Confirms Transfer	System displays confirmation that request has been sent to administrator					
46	Patient Transfer	UC-16	Doctor chooses to transfer a patient Cancels at any time through the process	System saves no information					
47	Patient Transfer	UC-16	Doctor Chooses to transfer patient Destination is invalid or full	System gives message that destination is full, awaits new input					
48	Patient Transfer	UC-16	Doctor Chooses to transfer a patient Invalid information is given	System notifys user of invalid information, awats cancellation or new correct info					
49	Update Patient Information	UC-17	Staff chooses to update information Staff meets requirements Fills out all fields Asaves changes	System saves updates and displays updated info					
50	Update Patient Information	UC-17	Staff chooses to Update information Invalid credentials	System doesn't allow changes to be made					
51	Update Patient Information	UC-17	1.Staff Chooses to Update 2.Cancels process at any time	System doesn't make any changes, goes back to previous page					
52	Private Messaging	UC-18	Medical Staff/Patient chooses to private message Medical Staff/Patient compose email, select who to send it to Sends the message.	Systems confirms message has been sent, and sends message to recepient					
53		UC-18	Medical Staff/Patient Chooses to private message Cancels message	Message is not sent					
54	Private Messaging	UC-18	User goes to private messaging Goes to view conversation	Displays conversation, allows for message to be sent from this spot.
